*It used to be so simple...*

Dental treatment, performed by the dentist in the dental office went on a dental insurance form. Medical treatment, performed by the physician went on a medical insurance form.

Simple as that - they rarely, if ever, crossed over!

Not anymore--more and more treatment and coverage requirements crossover between dental and medical. And if your staff isn't up-to-date and taking advantage of the latest coding rules, you could be disappointing your patients, losing money and/or delaying reimbursement.

*The Art of Practice Management comes to your rescue with the solutions:*

**"Crosswalking - A Guide Through the Crosswalk of Dental to Medical Coding"** - A comprehensive and easy-to-use manual, guide and educational resource that teaches the process of dental-medical cross-coding along with providing all of the medical codes that dental practices will need to file medical claims.

**"Abra-Code-Dabra"** - My medical coding seminar that teaches the medical coding process is now available on CD. Learning dental-medical cross coding can take place in the comfort of your own office with no additional expenses for travel and meals.

**"Forms and Letters"** - This CD provides for the easy downloading of the forms and letters contained in the manual. The CD enables practices to print these files or to adapt them to practice specific information.

**Yearly Update Service** - Medical codes update annually. This service keeps your manual current and prevents denied claims due to deleted or changed codes.

**Yearly Support Service** - The answer to your medical coding questions is just a phone call away with support service.

*Prepare your practice now.*

Prepare your practice now for medical coding. These valuable tools are available individually or as a discounted set. For pricing, testimonials, and additional information - please visit my web-site: [www.artofpracticemanagement.com](http://www.artofpracticemanagement.com)
